Subject: Information disclosure statement Under 37 C.F.R. §1.56.

This is an Information Disclosure Statement in accordance with the duty to disclose information material to patentability under 37 C.F.R. §1.56. The applicants
25 wish to make of record of the document listed on the accompanying form PTO/SB/08. It is respectfully requested that the Examiner initials the cited reference on the form and that it be made of record in the application and that a copy of the initialed form be sent to the applicants with the next communication from the Examiner.

30 Since the IDS is filed before the mailing date of a first Office action on the merits, consideration of the information disclosure statement is hereby requested according to 37 C.F.R. §1.97(b). The item of

information contained in the information disclosure statement was first cited in communications from the State Intellectual Property Office of People's Republic of China on June 3, 2005 for a counterpart foreign application.

5

According to the requirement set forth in 37 C.F.R. §1.98 and MPEP 609, the applicants are submitting a copy of Chinese patent document CN 2469502Y (published on January 02, 2002). The English language abstract of the Chinese patent CN 2469502Y is also provided below to fulfill the concise explanation requirement.

10

The English language abstract of the Chinese patent CN 2469502Y is presented as follows:

15

30

A wearable identification card of a computer user constructed in a two-layer structure. The two layers can be packaged and sealed together, or connected to each other in a moveable manner. The identification card includes a low power single chip circuitry, a wireless emission unit, and a battery. The identification card periodically emits an encoded signal or infrared message to a receiver connected to a transmission port of a computer, and the receiver decodes and transmits the encoded message to the computer. When the user leaves the computer to make the receiver unable to detect any message from the identification card, the computer turns a monitor into a safe mode and locks a keyboard. The identification card is small, power efficient, anti-interfere, and convenient to use.

Respectfully submitted,

Winston Hsu
